

Guidelines for *Canadian Journal of Public Health* Reviewers

File No. of Current Article _____

Title of Current Article _____

The answers you provide to the following questions concerning the abovementioned manuscript will help the Scientific Editor determine whether the article is acceptable for publication in the *Canadian Journal of Public Health*. After reading the manuscript, please answer the questions by circling your response. If you respond "No", "Uncertain" or "Improvement required", a detailed explanation should be provided to assist both the Scientific Editor and the authors of the paper.

Abstract

1. Is the research question properly stated?
 Yes Improvement required No
2. Are the study design and methods used clearly outlined?
 Yes Improvement required No
3. Are the major results clearly outlined?
 Yes Improvement required No
4. Are the main conclusions and recommendations clearly outlined?
 Yes Improvement required No

Introduction

5. Is the research question or hypothesis clearly stated?
 Yes Improvement required No
6. Is the stated research question **relevant**?
 Yes Uncertain No
7. Is the relevant literature analyzed and referenced in a concise fashion?
 Yes Improvement required No

Methods

8. Will the methods as presented allow other researchers to conduct similar studies?
 Yes Improvement required No
 9. Is the study design appropriate for the research question?
 Yes Improvement required No
 10. Are the methods appropriate for the research question?
 Yes Improvement required No
 11. Are the statistical methods used appropriate for the research question?
 Yes Uncertain No Don't Know

Guidelines for *Canadian Journal of Public Health* Reviewers

12. Should the manuscript be reviewed by a statistician or an epidemiologist?
 Yes No

Results

13. Are the results clearly presented?
 Yes Improvement required No
14. Are the results relevant to the research subject?
 Yes Improvement required No
15. Are the tables and figures appropriate and clear?
 Yes Improvement required No
16. Are the data credible (i.e., do they seem probable)?
 Yes Improvement required No

Discussion

17. Do the discussion and conclusions follow from the results?
 Yes Improvement required No
18. Are other interpretations examined and discussed?
 Yes Improvement required No
19. Are the limits of the study and of the results described?
 Yes Improvement required No

References

20. Are the references appropriate?
 Yes Improvement required No

General Considerations

21. Does the article constitute a new contribution to research?
 Yes No Not applicable
22. Is the article well presented (including the style of writing)?
 Yes Improvement required No
23. Should the article be published in the *Canadian Journal of Public Health*?
 Yes After minor revision After major revision No

On a separate page, please provide your detailed comments on the above answers or on other aspects of the article which, in your opinion, will assist both the Scientific Editor and the authors of the paper.
