# Message de l'ACSP

## Bienvenue à Santé publique 2025!

**Chaque année, des professionnels de la santé publique se réunissent à #PH25SP pour partager leurs savoirs et bâtir notre base de connaissances. Votre engagement continu à collaborer entre les disciplines et secteurs et au-delà des frontières pour protéger la santé et le bien-être des communautés partout au Canada ne cesse de m'inspirer.**

L'année 2025 est une année charnière, car elle marque deux décennies de collaboration en promotion de la santé publique entre les gouvernements fédéral, provinciaux et territoriaux par l'intermédiaire du Réseau pancanadien de santé publique. Au cours des dernières décennies, les leaders de la santé publique partout au pays ont travaillé sans relâche pour relever les défis de santé publique, qu'il s'agisse de maladies infectieuses ou chroniques. Je suis inspirée par le travail que les professionnels de la santé publique du Canada accomplissent chaque jour pour répondre aux besoins des communautés, y compris les communautés autochtones, guidés par les principes de diversité, d'inclusion et de réconciliation. En travaillant avec les différents systèmes et secteurs, vous contribuez à créer les conditions nécessaires à la santé et au bien-être pour toutes les personnes au Canada.

En **plaçant l'équité en santé au cœur de notre approche** et en produisant les bonnes données probantes pour éclairer une prise de décisions rapide et efficace, nos programmes et politiques peuvent obtenir les meilleurs résultats pour les communautés d'aujourd'hui et de demain.

Continuons à réfléchir aux leçons que nous avons apprises et à la façon dont nous pouvons continuer à établir les bases d'un système de santé publique plus résilient et apte à relever les défis de demain.

### #PH25SP : Un espace de dialogue, d'action et de transformation

Je vous encourage à profiter pleinement de cette conférence pour élargir vos réseaux et remettre en question vos présomptions. Que #PH25SP suscite des échanges significatifs et vous insuffle une motivation renouvelée!

**D<sup>re</sup> Theresa Tam**

Administratrice en chef de la santé publique du Canada

# CPHO Message

## Welcome to Public Health 2025!

**Every year, public health professionals come together at #PH25SP to share knowledge and build our evidence base. Your ongoing commitment to collaborating across disciplines, sectors and borders to protect the health and wellbeing of communities across Canada never ceases to inspire me.**

2025 is a milestone year as it marks two decades of collaboration in promoting public health across Canada's jurisdictions through the federal, provincial, and territorial Pan-Canadian Public Health Network. Over the past decades, public health leaders across the country have worked tirelessly to address public health challenges, be they infectious or chronic disease threats. I am inspired by the work public health professionals across Canada undertake each day to be responsive to the needs of communities, including the Indigenous communities, guided by principles of diversity, inclusion and reconciliation, and working across systems and sectors to create the conditions for health and well-being for all people in Canada.

By **placing health equity at the heart of our approach** and generating the right evidence to inform timely and effective decision-making, our programs and policies can achieve the best results for communities today and into the future.

Let's continue to reflect on our lessons learned and how we can continue to lay the foundation toward building a more resilient public health system that can meet the challenges of tomorrow.

### **#PH25SP: A space for dialogue, action and transformation**

I encourage you to take full advantage of this conference to expand your networks and challenge your assumptions. May #PH25SP spark meaningful exchanges and leave you with renewed motivation!

**Dr. Theresa Tam**

Chief Public Health Officer of Canada

Assiniboine Park Zoo

## Winnipeg extends a warm welcome to the **2025 Canadian Public Health Association Annual Conference**

As you'll soon find out, Winnipeg is a hip, happening, artsy and incredibly friendly city that you're sure to relish.

During your spare time, may we suggest watching polar bears swim above your head at Assiniboine Park Zoo? Or how about taking a journey that climbs from darkness to light at the Canadian Museum for Human Rights? At WAG-Qaumajuq, you can see the world's largest collection of contemporary Inuit art in a setting that pays homage to the Arctic. While The Leaf brings you to the tropics no matter what the weather is like outside.

### **And that's just a few of our attractions!**

Acclaimed dining, charming neighbourhoods, handsome architecture, verdant parks – this city has it in spades. And, if you should be so lucky to be here in winter (seriously!), the coolest frozen river trail awaits at The Forks, along with all manner of outdoor adventures.

## Rejoignez-nous lors des séances suivantes :

### **Nosh & Gab ! Un échange à l'heure du diner pour informer les priorités de recherche de l'ISPP-IRSC** 29 avril, de 12 h 00 à 13 h 15

L'ISPP invite tous les praticiens, décideurs et chercheurs intéressés à se joindre à une session à l'heure du diner pour se connecter avec d'autres personnes partageant des intérêts similaires et contribuer à façonner nos priorités de recherche. Dr. Kate Frohlich, directrice scientifique de l'ISPP, présentera notre plan stratégique actuel et nos orientations. Vous aurez ensuite l'opportunité de rejoindre une table pour discuter d'un sujet de votre choix. Nous avons hâte de vous rencontrer et de partager une excellente conversation autour d'un repas ensemble !

### **Chaires en santé publique appliquée | Une étude de cas sur la recherche appliquée et le plaidoyer** 30 avril, de 13 h 30 à 15 h 00

Le programme des Chaires de recherche appliquée en santé publique, une initiative conjointe de l'Institut de la santé publique et des populations (ISPP) des IRSC et de l'Agence de santé publique du Canada (ASPC), soutient les chercheurs en milieu de carrière pour effectuer de la recherche qui répond à des défis pressants en matière de santé publique, axée sur des solutions concrètes et intégrée aux processus de politique et à la prise de décision pour améliorer la santé et l'équité en santé. Dans le cadre de ce travail, les Chaires ont signalé l'importance et les défis liés à l'engagement dans la défense des intérêts et à la promotion de politiques et de services fondés sur des données probantes qui protègent et promeuvent la santé et le bien-être de la population. Lors de cette séance, un panel composé de trois Chaires et d'un décideur senior partagera leurs perspectives, leurs succès et leurs défis dans la défense de politiques et de services basés sur leurs résultats de recherche sur des problématiques de santé publique controversées et sensibles, telles que la réduction des risques et la décriminalisation des drogues illicites ; la confiance du public et les vaccinations ; les maladies infectieuses (re)émergentes et la surveillance des eaux usées.

Joignez-vous à nous pour une discussion engageante avec les panélistes Drs Kora DeBeck, Devon Greyson, Robert Delatolla et Perry Kendall, ainsi que la modératrice Dre Eleni Galanis.

## Join us at the following sessions:

### **Nosh & Gab! A Lunchtime Discussion to Inform IPPH-CIHR's Research Priorities** April 29th, 12:00 PM - 1:15 PM

IPPH invites all interested practitioners, decision-makers, and researchers to a lunchtime session to connect with others who have similar interests and to help shape our research priorities. Dr. Kate Frohlich, IPPH's Scientific Director, will share our current strategic plan and directions, after which you will have the opportunity to join a table to discuss a topic of your choice. We look forward to meeting you and having a great conversation over a meal together!

### **Applied Public Health Chairs | A Case Study of Applied Research and Advocacy** April 30th, 1:30 PM - 3:00 PM

The Applied Public Health Chair (APHC) Program, a joint initiative of the CIHR Institute of Population and Public Health (IPPH) and the Public Health Agency of Canada (PHAC), supports mid-career researchers to conduct research that addresses pressing public health challenges that is focused on actionable solutions and integrated with policy and decision-making to improve health and health equity. In leading this work, Chairs have reported the importance of, and challenges in, engaging in advocacy and championing evidence-informed policies and services that promote and protect population health and wellbeing. In this session, a panel of three Chairs and a senior decision-maker will share their perspectives, successes and challenges in advocating for policies and services based on their research findings on controversial, hot-button public health issues, such as harm reduction and the decriminalization of illicit drugs; public trust and vaccinations; (re)emerging infectious diseases and wastewater surveillance.

Join panelists Drs. Kora DeBeck, Devon Greyson, Robert Delatolla, and Perry Kendall, along with moderator Dr. Eleni Galanis, for an engaging discussion!

# Challenge accepted.

We don't expect solutions to come easy.

We use the power of leading-edge science to save and improve lives around the world.

For more than a century, we've been at the forefront of research, bringing forward medicines, vaccines and innovative health solutions for some of the world's most challenging diseases.

**MERCK**

# *Let's Grow* **TOGETHER**

Membership is important to us. We want to ensure that people who work in or care about public health in Manitoba know that there is somewhere to belong.

## **WHY JOIN THE MPHA?**

- As a volunteer run organization, memberships sustain our work.
- Connect with like-minded people who see things from a population perspective.
- Hear about events going on.
- Learn with us.
- Contribute, and engage in work that matters to you.

## Venez assister à notre discussion d'experts

Priorités partagées en santé :  
mesurer les progrès et  
combler les lacunes en  
matière de données grâce  
aux indicateurs communs

Les systèmes de santé du Canada sont mis à rude épreuve et nécessitent des améliorations dans plusieurs domaines. Pour faire face aux défis actuels, les gouvernements fédéral, provinciaux et territoriaux unissent leurs efforts en vue d'améliorer les soins de santé et de créer des indicateurs communs permettant de mesurer les progrès réalisés dans les domaines prioritaires de nos systèmes de santé.

**Mercredi 30 avril | 11 h à 12 h 30**

Cette discussion permettra

- d'examiner l'approche sur les priorités partagées qui vise à mesurer les progrès, notamment dans la sélection, l'élaboration et la diffusion d'indicateurs;
- de décrire l'approche collaborative permettant de cibler les sources de données et de combler les lacunes en matière de données;
- de discuter de l'utilité de ce travail pour la population canadienne et les décideurs des systèmes de santé;
- d'expliquer l'importance de ces mesures selon différentes perspectives, y compris celles des autorités compétentes et des personnes ayant fait l'expérience des services.

Le panel sera composé d'experts de Statistique Canada, de Santé Manitoba et de l'Institut canadien d'information sur la santé (ICIS), ainsi que d'un patient partenaire.

### Publication d'indicateurs communs en vue d'améliorer les soins de santé des Canadiens

En octobre 2024, l'ICIS a publié les résultats de 12 nouveaux indicateurs communs liés aux priorités partagées en santé. Cette publication fournit des résultats et une mise en contexte pertinente pour les 12 indicateurs communs dans 4 domaines prioritaires des systèmes de santé :

- Soins de première ligne
- Main-d'œuvre de la santé et chirurgies
- Santé mentale et utilisation de substances
- Information électronique sur la santé

Les résultats sont présentés pour le Canada et les provinces et territoires, et ils comprennent la répartition selon les facteurs de stratification de l'équité lorsque les données le permettent.

## Join our panel session

### Shared Health Priorities: Measuring progress and bridging data gaps with common indicators

Canada's health care systems are under enormous strain, requiring improvements in a number of areas. To address current challenges, federal, provincial and territorial governments are working together to improve care and to measure common indicators in areas of shared health priority.

**Wednesday, April 30 | 11:00 a.m. to 12:30 p.m.**

This exciting panel discussion will

- Review the shared priorities approach to measuring progress, including indicator selection, development and reporting
- Describe the collaborative approach to sourcing data and bridging data gaps
- Discuss the relevance of this work to Canadians and health system decision-makers
- Share why these measurements are important from different perspectives, including those of jurisdictions and people with lived experience

The panel will feature speakers from Statistics Canada, Manitoba Health and the Canadian Institute for Health Information (CIHI), as well as a patient partner.

## Release: Common indicators to improve health care for Canadians

In October 2024, CIHI released results for 12 new Shared Health Priorities common indicators. This release provides results with relevant context for 12 common indicators in 4 shared priority areas of our health systems:

- Primary health care
- Health workforce and surgeries
- Mental health and substance use
- Electronic health information

Results are presented for Canada and the provinces and territories, with equity breakdowns where available.

National Collaborating Centres  
for Public Health

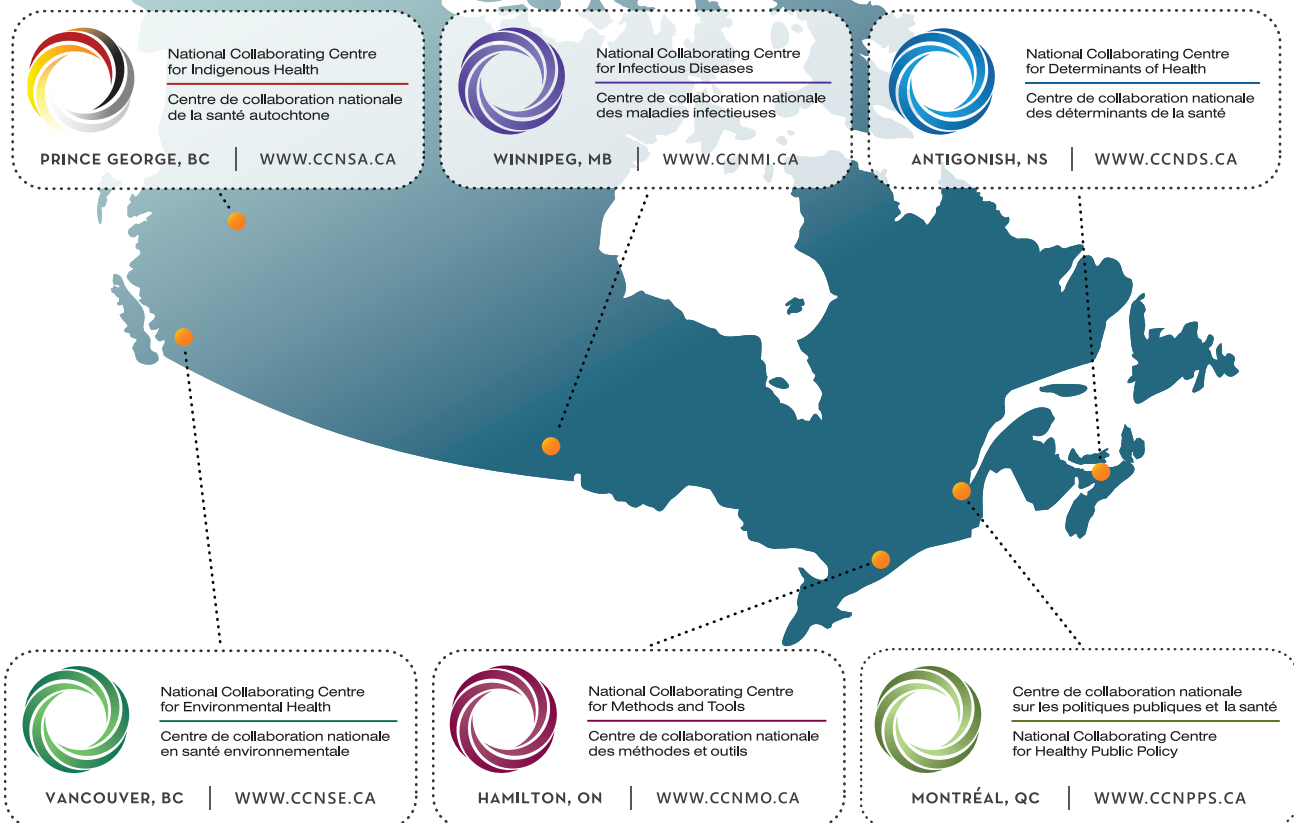

Centres de collaboration nationale  
en santé publique

Créés en 2005 et financés par l'Agence de la santé publique du Canada (ASPC), les six **Centres de collaboration nationale en santé publique (les CCN)** unissent leurs efforts pour promouvoir l'utilisation des connaissances issues de la recherche scientifique et des autres savoirs afin de renforcer les pratiques, les programmes et les politiques de santé publique au Canada.

Les CCN travaillent à repérer les lacunes dans les connaissances afin de stimuler la recherche dans les domaines prioritaires de santé publique et mettent en lien chercheurs et praticiens afin de créer des réseaux à la grandeur du pays. Ils traduisent les connaissances émergentes et existantes en informations faciles à comprendre au moyen de ressources informées par des données probantes, des produits multimédias et d'autres activités de mobilisation des connaissances.

Venez célébrer avec nous les 20 ans des  
CCN lors de notre séance à la conférence !

National Collaborating Centres  
for Public Health

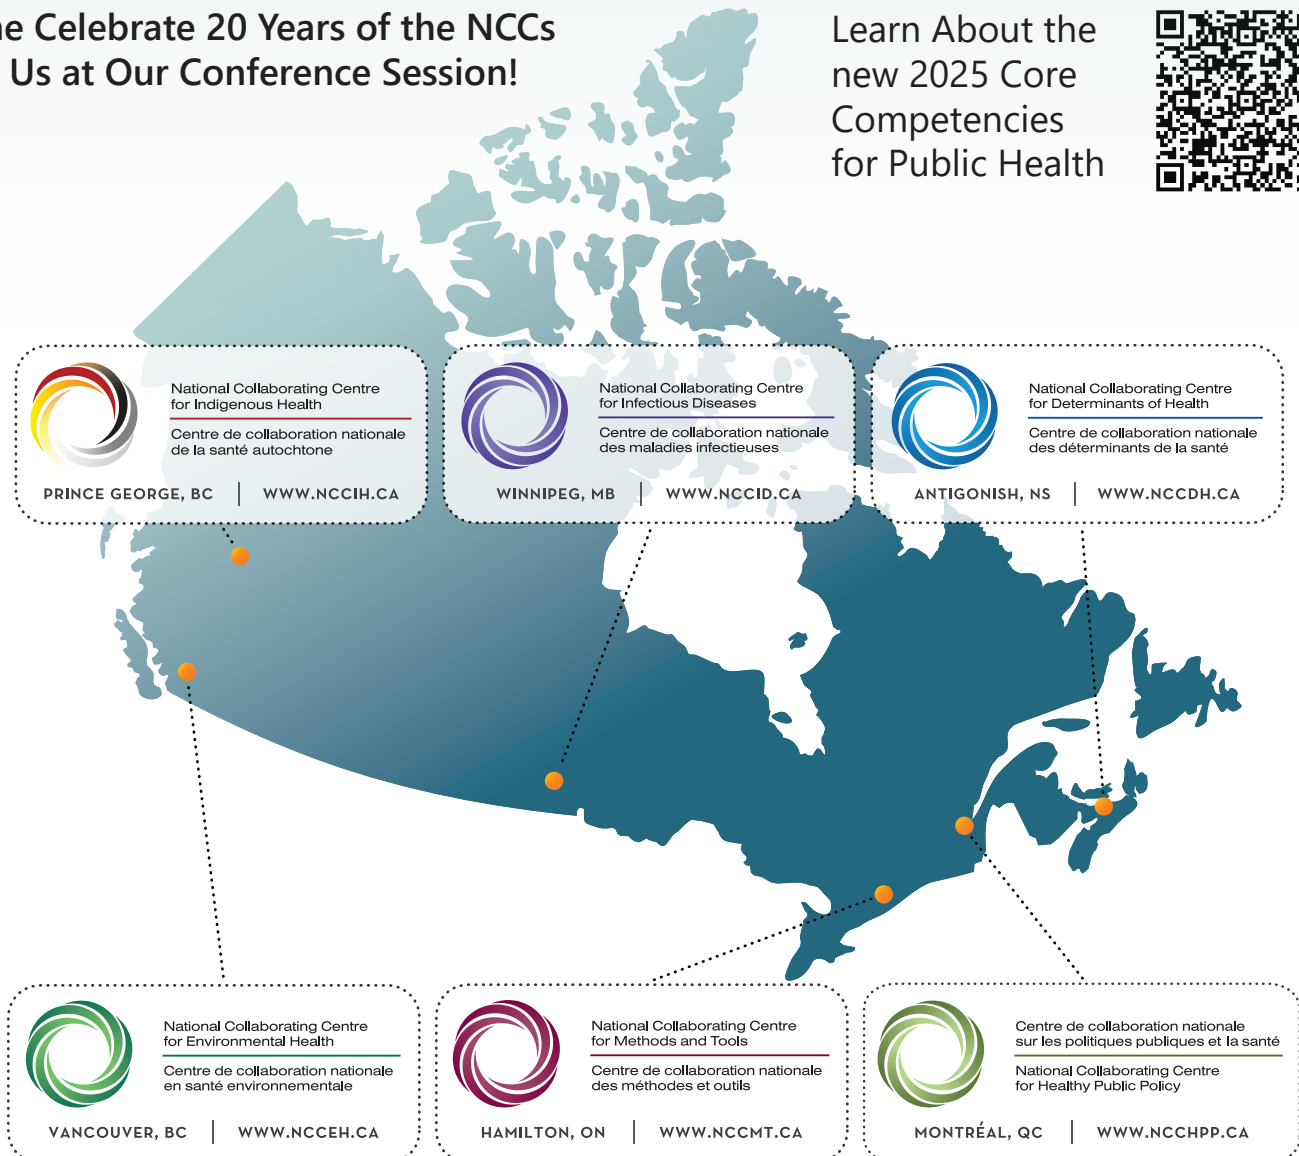

Centres de collaboration nationale  
en santé publique

Established in 2005 and funded through the Public Health Agency of Canada, **the six National Collaborating Centres for Public Health (NCCs)** work together to promote the use of scientific research and other knowledge to strengthen public health practices, programs, and policies in Canada.

The NCCs identify knowledge gaps to stimulate research in public health priority areas and link public health researchers with practitioners, building networks across Canada. New and existing knowledge is translated into easy-to-understand information through evidence-informed resources, multi-media products, and other knowledge mobilization activities.

**Health  
Sciences**

## AS A PUBLIC HEALTH PROFESSIONAL

Develop your leadership potential with one of Lakehead University's Master of Public Health programs. Whatever your schedule, our distance learning environment with flexible full-time study give you the opportunity to take your career to the next level.

### Master of Public Health:

- Distance education using webconferencing provides direct contact with instructors and other students without the requirement to attend classes on campus
- Study a Standard Full-time (2 years/6 terms) or Flexible Full-time (4 years/12 terms) basis

The Department of Health Sciences also offer the opportunity to complete the MPH with a Specialization in:

- Epidemiology
- Indigenous and Northern Health
- Gerontology
- Nursing
- Social-Ecological Systems, Sustainability and Health

## THROUGH INVOLVEMENT IN HEALTH RESEARCH

Lakehead University's Master of Health Sciences Program gives you the knowledge and research skills you need. Offering the only MHSc program between Winnipeg and Southern Ontario, this innovative program prepares you to be a part of the change.

### Master of Health Sciences:

- On-campus, **thesis-based** degree
- Study a Standard Full-time (2 years/6 terms) or Flexible Full-time (4 years/12 terms) basis
- Complexities of health sciences are studied through a focus on individuals, communities, and organizations

- Advanced methodological and health-related education prepares students for health research or further study

The Department of Health Sciences also offer the opportunity to complete the MHSc with a Specialization in:

- Epidemiology
- Indigenous and Northern Health
- Gerontology
- Social-Ecological Systems, Sustainability and Health

# CREATE KNOWLEDGE BUILD CAPACITY

## AS AN ENGAGED HEALTH RESEARCHER

Take your research skills to the next level with Lakehead University's Health Sciences doctoral program. Work with faculty and the community to better the health of at-risk populations through high quality applied health research.

### The Department of Health Sciences offers a PhD in Health Sciences:

- Research-intensive program emphasizing development of applied research skills
- Advanced training and in-depth understanding of the factors that put some groups at risk of poor health and health outcomes

### The program provides opportunities to:

- Work with faculty with expertise in aging; epidemiology; sustainable food systems; Indigenous and northern health; and social-ecological systems and health
- Engage in community-led, community-engaged, and place-based research
- Gain real-world experience in an applied health research setting through a Research Internship
- Study on-campus on a full-time (4 years/12 terms) or flexible full-time (8 years/24 terms) basis

World Health  
Organization

Americas Region

## Health – a key driver for development, prosperity, and security

The Pan American Health Organization (PAHO) is the specialized international health agency for the Americas and the Regional Office of the World Health Organization. With more than 120 years of existence, PAHO provides technical cooperation and support to the countries of the Region to improve well-being and health for its populations.

PAHO's main priorities include building resilient health systems, eliminating communicable diseases, integrating noncommunicable diseases into primary health care, boosting regional manufacturing capacity, promoting digital health, fighting antimicrobial resistance, strengthening the health workforce, mental health and suicide prevention, and reducing maternal mortality.

PAHO has a longstanding partnership with Canada working on priority areas such as immunization, disease elimination, sexual and reproductive health, gender and health equity, and the health of women, children, and adolescents in situations of vulnerability. For more information on this collaboration, visit: [www.paho.org/en/canada](http://www.paho.org/en/canada).

**OUR MISSION**

To enhance the health of all people and communities in Canada, particularly those who are structurally disadvantaged, and to contribute to a healthier and more equitable world

**Porte-parole national indépendant et défenseur fidèle de la santé publique, l'ACSP parle au nom des individus et des populations avec tous les ordres de gouvernement.**

Nous préconisons l'équité en santé, la justice sociale et la prise de décisions éclairées par les données probantes. Nous misons sur le savoir, repérons et abordons les problèmes de santé publique, et relions diverses communautés de pratique. Nous faisons valoir la perspective et les données probantes de la santé publique auprès des chefs du gouvernement et des responsables des politiques. Nous sommes un catalyseur de changements qui améliorent la santé et le bien-être de tous.

**NOTRE VISION**

Des gens et des communautés en bonne santé prospérant dans des environnements rassembleurs, équitables et durables

**NOTRE MISSION**

Améliorer la santé de toutes les personnes et toutes les communautés du Canada, en particulier celles qui sont structurellement défavorisées, et contribuer à l'avènement d'un monde plus sain et plus équitable
