

part of Canada's Immuno-Engineering and Biomanufacturing Hub

Reports to	Dr. Rackeb Tesfaye, Knowledge Mobilization Lead
Hours	Temporary full-time (37 hours/week), to February 2028
Positions	Three positions are available
Salary range	\$70,000 to \$85,000 CAD per year plus benefits
Location	Simon Fraser University, Burnaby campus (hybrid, with an expectation of being in the office 3 days per week)

KNOWLEDGE MOBILIZATION SPECIALIST

The Knowledge Mobilization Specialist conducts the planning, implementation and evaluation of activities within the Bridge Research Consortium (BRC), Canada's Immuno-Engineering and Biomanufacturing Hub (CIEBH), and other collaborating hubs. The Specialist will contribute to boosting KMB capacity within the BRC and will have the opportunity to contribute to the development of outputs, products, activities, and events to advance public trust and equitable access to new vaccines and immune-based innovations related to pandemic preparedness and response.

ABOUT THE BRIDGE RESEARCH CONSORTIUM

The BRC is one of four projects funded by the Government of Canada, as part of Canada's Immuno-Engineering and Biomanufacturing Hub (CIEBH) at UBC. It is also one of 19 projects funded in 2024, under Canada's Biomanufacturing and Life Sciences Strategy, "to rebuild a strong and resilient domestic biomanufacturing and life sciences sector" ahead of a future pandemic event.

While Canada is poised to achieve exciting and important scientific breakthroughs, the COVID-19 pandemic showed that support for the optimal uptake of new vaccines and therapies is also needed. The decline of vaccine uptake within some populations over the past decade risks the return of vaccine preventable diseases and undermines the capacity for Canada to respond effectively to a future pandemic. In this context, the BRC has been funded as a unique collaboration of leading social sciences and humanities scholars across Canada. The Consortium brings together expertise in anthropology, bioethics, communications, history, international relations, law, political science, public administration, sociology and other disciplines, with public health, clinical medicine, and nursing.

Led by Professor Kelley Lee (Simon Fraser University) and Professor Ève Dubé (Laval University), the project brings together wide-ranging expertise and perspectives to better understand and support public trust and equitable access to new vaccines and immune-based innovations that strengthen Canada's readiness for future health emergencies.

DUTIES AND RESPONSIBILITIES

Providing a full range of services, opportunities, and resources to enhance the CIEBH and projects of other hubs activities by:

- Acting as a node between the BRC and collaborating hubs to assess KMB needs and opportunities
- Working with BRC members and collaborators to identify and understand audiences, communities, and other priority knowledge users to tailor and disseminate outputs
- Translating diverse forms of evidence (research articles, key informant interviews, consultations, etc.) from various disciplines (e.g., microbiology, health equity, law, etc.) into clear and accessible language or visual summaries
- Developing and/or coordinating the development of KMB outputs, such as science museum exhibits, policy briefs, evidence summaries, blogs, newsletters, and infographics and articles for lay publications

- Sourcing the translation of materials into relevant languages
- Providing KMB consultations with BRC members and collaborating hubs
- Executing the implementation of KMB strategies and plans
- Assisting with coordination and logistics support for KMB-related events, such as meetings, conferences, research symposiums, consultations, etc.
- Supporting dissemination on communication platforms such as websites, newsletters, etc.
- Coordinating contact with and vetting external services for content creation (e.g., contracting video production company, graphic designer, etc.)
- Costing all KMB activities and submit for approval to the Project and Operations Manager and Scientific Co-Directors

Contributes to the BRC's KMB strategy and capacity building by:

- Mapping potential partners and knowledge user networks that can support collaborator needs and activities
- Actively promoting Equity, Diversity and Inclusion (including supporting the engagement of priority populations)
- Leading the operational management of KMB documents, repositories, communications and scheduling
- Working with the KMB Hub Lead to review, refine, and develop resources and toolkits to increase accessibility and use
- Supporting the academic publishing of KMB frameworks, approaches and outputs produced by the BRC
- Participating in continuous learning and peer-to-peer learning opportunities with colleagues, partners and networks to advance knowledge and competency of effective knowledge mobilization practices

Coordinates the evaluation of KMB impact and effectiveness by:

- Developing and maintaining a portfolio of KMB initiatives undertaken by BRC collaborators
- Supporting the tracking, monitoring, analyzing and reporting of KMB activities and engagement

QUALIFICATIONS

- Master's degree in Social Sciences, Life/Biological Sciences, Health Sciences or a related field and two years of related experience in community engagement, science communication, and knowledge mobilization or an equivalent combination of education, training and experience
- Understanding of knowledge mobilization theory and practice
- Excellent organizational skills and attention to detail
- Excellent interpersonal and communication (verbal and written) skills, with particular emphasis on plain-language communication
- Excellent interpersonal skills

- Intermediate skills using Adobe or Canva (or other design tools), editing videos and audio, newsletter tools, SurveyMonkey, website platforms
- Ability to build and maintain relationships with diverse colleagues, teams, networks, and community
- Ability to understand complex research and innovations related to immunology science
- Ability to work cooperatively and effectively
- Ability to create and disseminate social media and use tools to assess engagement across such platforms
- Ability to use database, word processing, spreadsheet, graphic design and web publishing applications
- Ability to effectively communicate and interact with empathy, understanding and respect of diverse and divergent perspectives and behaviors
- Ability to work independently, establish priorities, meet deadlines, and work on a number of different initiatives concurrently
- Familiarity with program evaluation
- Familiarity with evidence reviews (e.g, rapid literature reviews, scoping reviews, etc.)
- Working knowledge of research concepts, principles, protocols, procedures and terminology
- Has received or is willing to receive EDI and Indigenous cultural safety and competency training

RELATIONSHIPS

- Direct reporting to: Knowledge Mobilization Lead
- Works closely with: Knowledge Mobilization staff, Project & Operations team, and other BRC Secretariat members
- Accountable to: Project and Operations Manager and BRC Scientific Co-Directors (Professors Kelley Lee and Ève Dubé) for alignment with approved workplans, deliverables, projects, and outputs
- Regular interaction with: BRC members, Secretariat staff, partners, collaborators, knowledge users, and community stakeholders
- Financial accountability: Project and Operations Manager (with large purchase approvals by the Scientific Co-Directors)

HOW TO APPLY

Please submit your CV and cover letter by email to bridgerc@sfu.ca. The application deadline is 11:59 pm PST on **November 1, 2025**. *Note: Applications without cover letters will not be reviewed.*

EMPLOYMENT EQUITY

Simon Fraser University is committed to employment equity and encourages applications from all qualified persons, including visible minorities, Indigenous people, persons with disabilities, and LGBTQ-identified persons. Located on unceded Coast Salish Territory — the traditional territories of the səlilwətał (Tsleil-Waututh), kwikwəłəm (Kwkwetlem), Skwxwú7mesh Úxwumixw (Squamish) and xʷməθkʷəy̓əm (Musqueam) Nations, SFU is actively building an increasingly diverse and inclusive community.
